# CHAFEY CAMP HAS THE YELLOW METAL

District Breaks Record for Young Camps in Sending Out Ores.

CHARLES TAYLOR IS BACK FROM CAMP

Charles Taylor, general manager of the Pioneer Ore Sampling company, who prevailed on the mine ewners to send a shipment first to the Salt Lake market to ascertain if even better terms than the Balaklala people had offered could not be secured.

Mr. Taylor arrived in Salt Lake City Monday morning with a sample consignment of Chafey ores, to solve the market problem, and every effort will be made to have these ores reach the Salt Lake City smelters hereafter. The ore carries gold mainly, some of it being in the free state, much of it having silver values, also. Mr. Taylor is a pioneer of the Chafey district; in fact, when he entered the camp there was not a restaurant there. Now the camp has its restaurants, hotels, saloons and everything usually found in a new and lively Nevada mining camp. When asked for an expression of the district, Mr. Taylor said:

"The Salt Lake City newspapers, always to the front in handling Nevada mining news, need not hesitate to talk about Chafey, for it is one of the great gold-producing sections of Nevada, even though its age of modern development is numbered by two short months. When a district can ship out ore valued at \$100,000 at an age of two months, that should demonstrate to the world that there is merit there.

the world that there is merit there. At the present time there are several

At the present time there are several twelve, eight and six-horse teams bauling out ores to Mill City and bringing back supplies. The haul per ton is \$4.50.

"There is a great deal of rich shipping ore in the district, but there likewise is an enormous tonnage of milling grade rock available, which was developed, but not extracted in the early days. This milling ore was brought to light before the days of the Comstock, for you know, the camp of Chafey, as it is known today, sent many a stampeder to the Comstock. There is a mill already in the camp, owned by Mr. Chafey and this will give the leasers a tremendous advantage over other new Nevada mining camps, for it provides an immediate market for their ores, where other sections must await the erection of a plant to treat the tock too low in values to stand direct consignment to the markets. Associated with me are Edwin S. Chafey, the man who brought the core head to like after years of camp, owned by Mr. Chafev and this will give the leasers a tremendous advantage over other new Nevada mining earners, for it provides an immediate market for their ores, where other sections must await the erection of a plant to treat the vock too low in values to stand direct consignment to the markets. Associated with me are Edwin S. Chafev, the man who brought the camp back to life after years of neglect; Jack Bishon, and Harry Osler, in a leasing proposition on the Mac Muller in the early days produced over \$300,000 worth of ores, the old timers doing a great amount of development way. the camp back to life after years of neglect; Jack Bishon, and Harry Osler, in a leasing proposition on the Mae Muller claim. The Mae Muller in the early days produced over \$300,000 worth of ores, the old timers doing a great amount of development work which we are taking advantage of to-day.

The Mae Muller was a producer The Mae Muller was a producer from grass roots, and naturally a fine tonnage of milling ore was brought to light and left where the original operators found it. We have found a 31½-foot streak of rock that averages \$20 per ton. Eight inches of this ranges up to as high as \$400 per ton, while for seventy-five feet, three feet of it will average \$24.50 per ton. An old tunnel was driven on our lease years ago for 177 feet. We drove it fifty-five feet farther on, cutting our yein. We have drifted on it on the hanging wall side for 110 feet, and have upraised thirty-feet making for the older workings, where we know our ore is exposed. We have a 15-borsepower hoist and a compressor, and there is not a better equipped lease in the camp than ours.

"The reports that Mr. Chafev owns the whole district, and the foolish reports that there is only any time."

BACK FROM CAMP

Says Chafey Is Not One-Man
Camp, With Only One
Vein.

The management of the Balaklala wants the gold ores from the new Nevada mining camp of Chafey, and Salt Lake City wants them, also. Several days ago representatives of the Balaklala company entered the Chafey camp and made the mine operators terms for their ores which were so much more

BACK FROM CAMP

pointed at not getting some of the cream of the camp for themselves, Mr. Chafey has some very valuable holdings there, the best the camp now has naturally, as he was the first to enter the camp and had the pick of everything for himself. On one of his properties he has driven a tunnel for 200 feet on five feet of \$125 gold ore, and now has a face of eight feet of same value. He has sunk on this ore for fifty-five feet, and has opened it 200 feet farther on, so you could say safely that there are 400 feet of this body shown along its strike. And 600 feet east is a parallel vein, showing average values of \$51.50 per ton. Mr. Chafey is now installing a 40-horsepower hoist and compressor, and with power drills soon will be making splendid progress.

"Mr. Chafey has some very valuable holdings there, the best the camp now has naturally, as he was the first to enter the camp and had the pick of everything for himself. On one of his properties he has driven a tunnel for 200 feet on five feet of \$125 gold ore, and now has a face of eight feet of same value. He has sunk on this ore for fifty-five feet, and has opened it 200 feet farther on, so you could say safe. It has a face of eight feet of same value. He has sunk on this ore for fifty-five feet, and has opened it 200 feet for the same value. He has sunk on this ore for fifty-five feet, and has opened it 200 feet feet, and has opened walue. He has sunk on this ore for fifty-five feet, and has opened it 200 feet on five feet of \$125 gold ore, and now has a face of eight feet of same value. He has sunk on this ore for fifty-five feet, and has opened it 200 feet on five feet of \$125 gold ore, and now ha

lala company entered the Chatey camp and made the mine operators terms for their ores which were so much more favorable than the market that those interested were willing on the spot to enter ipto a contract. But there was a Salt Laker on the scenc, and he was Charles Taylor, general manager of the Pioneer Ore Sampling company, who prevailed on the mine owners to send a shipment first to the Salt Lake market to ascertain if even better terms than the Balaklala people had offered could not be secured.

Mr. Taylor arrived in Salt Lake City Monday morning with a sample consignment of Chafev ores, to solve the market problem, and every effort will be made to have these ores reach the Salt Lake City smelters hereafter. The ore carries gold mainly, some of it being in the free state, much of it baving silver values, also. Mr. Taylor is a pioneer of the Chafey district; in fact, when he entered the camp there was not a restaurant there. Now the

Salt Laker, who has been prominently connected with Goldfield mining, has become associated with Mr. Taylor, and they will open headquarters in Chafey at once.

#### TINTIC SILVER CROWN LISTED ON EXCHANGE

The Tintic Silver Crown Mining company's stock was listed on the local exchange Monday morning. This company is capitalized for 1.000,000 shares of stock par value 10 cents, 445,000 shares originally being in the treasury. Out of this treasury stock, 62,000 shares have been sold, and there is now the sum of \$845 in the strong box. The company owns twenty-five patented claims in the Tintic section, several of which have previded ores for the market in the past, and on which there is at present a very gratifying showing of gold, lead and silver ores. Two cars of ore are now waiting to be sent to the Sait Lake smelters. E. P. Jannings, the mining engineer, recently reported on this property. J. A. Edwards is president and M. L. Snow is secretary and treasurer of the company.

### BEAVER COUNTY NEEDS ORE HAULING OUTFITS

New-York Boston Letters.

James A. Pollock & Co., bankers and brokers, 6 West Second South street, fur-nish the following, received over their nish the following, received over their private wire yesterday afternoon:
Walker Letter-New York-The market today was quite active and, in some cases, very strong. Reading was the feature and was bid up easily and shorts were forced to cover. Prices were steady most of the day, although they sold off about noon. In the afternoon strength developed again and continued till the close. The market acted very well all day and traders rather look for the advance to continue. Money was firm, but without change.

# HOW UTAH MINES

Sidney Norman, Mining Editor of Los Angeles Times. Likes Utah's Manner.

SALT LAKE IS THE HUB OF PROSPERITY

Example of Utahns Taking Advantage of Mines Lesson to Los Angeles.

Sidney Norman, mining editor of the Los Angeles Times, who has been in Salt Lake for several days past get ting in touch with Utah mining conditions, expressed himself as being very much pleased both with the quality of Utah's banner industry and the manner in which Utah regards this remuperative branch of its affairs. Mr. Norman is well known to the majority of Utah mining men and to the indutry throughout the country, where his merits and talents are thoroughly ap-preciated. He has visited Bingham and Gurfield during the past few days, and when asked by The Tribune Monday for his impressions he said:
"The mining man who visits Salt

Lake City detects a kindred spirit the moment be enters the state, and as ac draws nearer to the bus of the industry the feeling is more pronounced. I have not been in Salt Lake for nearly two not been in Salt Lake for nearly two years, and can only say that the improvement I notice is little short of marvelous. I do not believe that it is too much to say that Salt Lake is the most prosperous mining center on the continent today. Kate Field once said that Salt Lake is made up of 'Mormous and Mines.' That may have been true at one time but it were that true at one time, but it seems to me that the Mormons have been losing control for the past few years, and that the mines have been ascending in bal-

the mines have been ascending in balloons.

"The mining spirit seems to be everywhere—on the trains, in the hotel corridors, in the banks, on the street corners and, in fact, anywhere where men do congregate. It seems to me that, the debt owed by your city to such men as D. C. Jackling, Samuel Newhouse and others of the same caliber is only partially understood, even by yourselves. Their public spirit in offering large donations towards the establishment of a mining temple for the American Mining congress has done a great deal towards drawing the attention of the world to your claims, and has even convinced Denver that her laurels of supremacy are in danger. Since coming here I have visited the immense plant of the Utah Copper company and can only say that it is a liberal education in itself. Over 1100 Johnson vanners working at the same time is a sight that cannot be seen anywhere else in the world, and this is another monument to a man who has brought your claims of supremacy be-

where else in the world, and this is another monument to a man who has brought your claims of supremacy before the mining world.

"I am on my way to Pioche and Goldfield in the interests of my paper, the Los Angeles Times. It has taken the lead in an effort to arouse Los Angeles to a true sense of the importance of the development of her mineral resources, and I am glad to say that the campaign is already beginning to greater share of the mining business originating in the great copper fields of Arizona, in the high-grade mines of Nevada and in the properties that are now beginning to claim attention in Mexico. The completion of the Tonopah & Tidewater and the Las Vegas & Tonopah railroads has been of immense benefit to the city, and within the past two years the influx of mining men looking for permanent homes has been very large. I estimate that within that time, at least \$10,000,000 has been derived from that source alone by Los Angeles and that it has been injected into her arteries of commerce.

"In the past Los Angeles has paid all too little attention to her possibilities in the mining line, but, as I said

ties in the mining line, but, as I said before, a great change of sentiment is now apparent. The main trouble, to my hanging wall side for 110 feet, and have upraised thirty feet making for the older workings, where we know our ore is exposed. We have a 15-borsepower hoist and a compressor, and there is not a better equipped lease in the camp than ours.

"The reports that Mr. Chafev owns the whole district, and the foolish reports that there is only one vein in the camp, are erroneous, and have been started by parties who were disapindustrious fakers who infest the city in the hope of raising money from the annual crop of tourists from the East. The Times has, however, commenced a campaign of extermination within the past two months, with the result that two of the worst fakers yet exposed are under indictment on a felony charge. Within the past two weeks one of the leading banks has taken the lead in recognition of standard mining securities as collateral. This will mean that others will be compelled to follow.

"Steps have now been taken to organize a mining club of a social nature under some such comprehensive title as the Sierra Nevada, and it is

ganize a mining club of a social na-ture under some such comprehensive title as the Sierra Nevada, and it is hoped in this way to impress upon the mining man that his business is wanted in Los Angeles and that the city appreciates the importance of her mineral

Ore Shipments.

The Pioneer sampler on Monday re-sused 6 cars of ore from Utah and 3 cars rom Idaho camps.

The Taylor & Brunton company re-used 3 cars from Utah and 4 from Ne-

Ore and Bullion. The ore and bullion report for Monday, given by McCornick & Co. was as follows: Ore received, \$10,000, bullion shipped, \$50,000.

Metal Market. The metal quotations for Monday, post-id by McCornick & Co., were as follows: Silver, 512c; lead, \$1.60; copper, 13gc.

SLOW MARKET ON

There was little excitement Monday on the local exchange, and the only sensational feature of a dull market was the way some of the stocks lost their high levels. Among these was the Emma Copper, an unlisted stock. During the day a total of 67,700 shares of stock sold, having a market value of \$44,714. The following were the unlisted and listed stock transactions:

THE MINING CHANGE SMELTER MEETING TO TAKE PLACE IN ZION

> American Officials Soon Wil Gather Here to Discuss Company Matters.

Some time during the present week, or the first of next week, there will be an important meeting in this city at which the smelting situation from an American Smelting and Refining standpoint will be discussed pro and con-Daniel Guggenheim, president of this company, and S. W. Eccles, the vicepresident, are expected within the next few days in this city, and a few of the other Guggenheim officials now are gathering in.

While no one connected with the com-pany desires to talk about this meeting. there are those who profess to believe that important matters will be taken up and disposed of. Among these is the up and disposed of. Among these is the Garfield smelter, which, Eastern authorities say, has been a disappointment, and never has treated over 1200 tons of ore a day, while the shipments to the plant have been enormously out of this proportion. Some say the company has not sufficient sampling or furnace ca-pacity, and others say the furnaces are not of the proper type for smelting the concentrates from the Utah Copper mill

at Garfield.

There must be a serew loose somewhere, and if the location is not known yet, it is likely that it will be searched for at the coming meeting in this city.

## MASON VALLEY STOCK LISTED ON EXCHANGE

Well-Known Yerington Issue Will Be Called on 'Change Tuesday.

The application of the Mason Valley Mines company for listing the stock on the local exchange was approved by the listing committee on Monday, and this well and favorably known Verington stock will be called for the first time this morning. The Mason Valley Mines company is capitalized for 1.000,000 shares of stock, par value \$1. Originally there were 300,000 shares of stock in the treasury, but from this amount 70,000 shares have been sold, leaving a balance of stock in the treasury of 230,000 shares. The stock is not assessable. There is in the treasury of this company the cash sum of \$55,000.

The Mason Valley Mines company owns seven patented claims in the Yerington. Nev., district, on which 200 feet of shafts, 4000 feet of tunnels, 200 feet of upraises and 1000 feet of cross-cuts have been done. The management has developed one of the spectacular sulphide ore showings of Nevada, and several dumps contain a splendid toninge of 6 per cent copper ore. The property has shown up ore practically in every direction work has been done, and only a small portion of its territory has been prospected. The possibilities of the future are best measured by the find recently of characteristic copper ores in absolutely virgin ground some distance to the southeast of the first ores encountered which first gave this mine its fame. Forty men are now employed.

The stock of this company is held largely in Salt Lake, and it has been a Salt Lake corporation from the beginning. Salt Lakers like the mine and the management, and recently were given the opportunity of securing their share of treasury stock let go at \$1 per share when the stock was selling for \$1.75 to \$1.80 on the local exchange. Everyone here, therefore, is delighted

share of treasury stock let go at \$1 per share when the stock was selling for \$1.75 to \$1.80 on the local exchange. Everyone here, therefore, is delighted with the listing of this stock. It has been one of the active unlisted stocks locally for two years, and the stock is being asked for on the Eastern curbs. William H. Smith is president, F. J. Knobloch is secretary and F. W. Holmes is treasurer of the company.
